

CARLOS PINZÓN

FRONT-END DEVELOPER / CHEMICAL ENGINEER

Bucaramanga, Colombia, 170505 | (+593) 961282649 |

cafer89@gmail.com

Personal Website: <https://carlosfpj.github.io/Portfolio/>

Github Profile: <https://github.com/carlosfpj>

Front-end developer with 10 months of experience in front-end technologies for digital product development. I like to build fast, scalable and professional web sites.

I'm very enthusiast around all the Javascript and React.js development ecosystem and it's application to real world products.

PROFESSIONAL EXPERIENCE

DIGITAL TECH IDEAS

Position: Junior Frontend Developer. (Jan 2022 – Present)

- Develop modern interfaces, forms, and simple visual effects for in-house products using the Javascript language and its React.js interface development library.
- Provide clearer and more readable information.
- Guarantee an improved user experience.

PERSONAL PORTFOLIO

Unit Converter (<https://carlosfpj.github.io/unitconverter/>)

Web app built in React.js via npm create-react-app, using modern React.js tools like hooks, functional components, conditional rendering, context API and more.

The application helps to make basic conversions of measurement units of length, mass, area, volume, time and temperature.

Weather-App (<https://weather-app-seven-pi.vercel.app>)

Mobile-first application developed in HTML, CSS and Javascript. Using the geo-location API with the aim of displaying the current weather of the application user's geographic location, in addition to showing the forecast weather for the next five days of the week for every 3 hours.

The data is extracted with a Fetch request to the OpenWeather API and its JSON response is processed properly in order to display the correct data in the corresponding position.

TECH-LANGUAGES

- HTML (2 Years).
- CSS (2 Years).
